С

А

VUCA is an acronym that captures common conditions that can impact our business and the way we work: Volatility, Uncertainty, Complexity, and Ambiguity.

Volatility refers to the speed of change. Change in healthcare can be fast and unpredictable. V **Uncertainty** about the future can lead to a lack of understanding and/or awareness of how we U do our work.

> **Complexity** is the number of factors that need to be considered, from patients and processes to managing teams and completing tasks.

Ambiguity is the lack of clarity about how to interpret information. This can include mixed messages and general confusion.
